TEACHING SOCIAL STUDIES IN THE ELEMENTARY SCHOOL

COURSE DESCRIPTION
An analysis of trends and practices of teaching social studies in the elementary school. An emphasis will be made on how to transfer theory into practice through preparation of activities and materials appropriate for the elementary classroom and critical reflection on those very materials and approaches. Students will plan instruction considering student-based diversity, instructional demands of the field and the best integration of other tools and disciplines. Teaching candidates will be required to prepare these instructional elements focused on the Virginia Standards of Learning.

RATIONALE
Cognitive skills evolved from the need to place a heavier emphasis on content being developed in the General Studies while the technique for communicating those skills to elementary grade children has been designated as the role of the School of Education. In the area of social sciences, the focus must be upon the development of cognate skills as opposed to the mere retention of facts. Current teachers must stay abreast of the latest approaches to instructional practice in elementary social studies, to include general philosophical approaches and specific tools and techniques.
