EDUC 650
SPECIALISTS FOR READING/MATH PROGRAMS

COURSE DESCRIPTION
An investigation of research-based intervention for reading or math programs. The role of the reading or math specialist to the total school program is also examined. Field experience required.

RATIONALE
It is imperative for every school to hire educators who are prepared to develop programs and support classroom teachers in planning differentiated instructions for students with special needs. This course focuses on meeting the specific needs of young children and students with math or reading difficulties. The responsibility for meeting these needs is often assigned to program specialists, such as reading and math specialists. Our professional responsibility and spiritual mandate is to minister to individuals with unique needs as God created us, “I will praise You, for I am fearfully and wonderfully made; marvelous are Your works, and that my soul knows very well” (Psalm 139:14).
