COURSE SYLLABUS
NURS 522
PERFORMANCE MANAGEMENT IN HEALTHCARE

COURSE DESCRIPTION
This course will allow students to explore the concepts that support a sound approach to managing performance. Performance management is a proactive and ongoing process which strives to align individual, unit, and/or team performance with the mission, vision, and strategic goals of the organization. When organizational goals are established, performance metrics are created along with a methodical measurement process that will support analysis of performance. Performance management also implies that leaders are managing their individual staff through relationship and rapport building, investment in the ongoing growth of employees, goal setting, motivating and rewarding staff, and giving feedback at regular intervals.

RATIONALE
Effective leaders proactively manage the performance of their team(s). The aspiring healthcare and/or nurse leader will be exposed to concepts, strategies, and competencies that will fortify their approach to leading through strong relationship building, delineation of roles for team members, use of monitoring metrics, and attainment of desired outcomes/goal achievement.
